Work Experience

Full Stack Developer at BrandOPC Solutions, Australia — 2023 - Present

- Spearheaded the end-to-end development of a dynamic **React web application**, seamlessly integrating a Django backend and PostgreSQL database.
- Leveraged **React.tsx** to create an intuitive and responsive user interface, ensuring optimal user experience.
- Implemented robust backend functionalities using **Django**, facilitating seamless data flow and efficient server-side operations.
- Employed HTML, CSS, and JavaScript to implement responsive design changes, enhancing the website's visual appeal and user interaction.
- Worked closely with UX/UI designers to implement design specifications and ensure a consistent and visually appealing user interface.

Software Engineer at FORD CREDIT (IT) — 2021 - 2023

- Developed and maintained both server-side and client-side intranet web application using Angular, enhancing user interface and user experience, resulting in a better user experience for both internal and external teams
- Deployed a client based website with the new implemented changes in the production environment
- Worked with Excel for maintaining the records of Clients further push the developed Email and SMS templates with respective data
- Assisted in the examination of business needs and converted them into technical specifications
- Created robust and efficient backend services, ensuring seamless integration with frontend facing internal staff for SMS push system components with **Java**
- Participated in code reviews, identified and resolved issues, and ensured code quality and best practices were upheld.
- Incorporated Agile development methodologies, including daily stand-up meetings and sprint planning sessions.

Projects

Food Delivery Website - React + Django (2023)

- A website to deliver food, built with React TypeScript and powered by a Django backend, seamlessly connects users with their meals. The platform prioritizes security by restricting food orders to authorized individuals.
- *Skills : React typescript+ Refine framework, Django, Power access platform*

Angular based Website at Ford Credit (2022)

- Worked on front-end Theme changes and learnt new techniques and modules with Angular.
- *Skills : Angular, HTML, Typescript, CSS, Java, Spring, Visual Studio Code*

Social Media Website at RMIT 2023

- A website with MVC architecture that has a structure of a social media website. Developed using JavaFX , Java and a local database which can store and retrieve users social media posts along with their user details.
- *Skills : JavaFX, Java Data Structure, Oracle Server*

Telepresence Robot | Capstone Project (2019-2020)

- A robot used in conference halls and hospitals. Application of DTMF to connect mobile and robotic controlling. Here, in our project, we have used an app that we have created, instead of DTMF signals.
- *Skills : IOT, Android app Development, Arduino*

Skills

React : Typescript, Django, Postgresql, Angular, HTML, Typescript, CSS, Java, Spring, Visual Studio Code, JavaFX, Oracle Server, PHP, JavaScript, MySQLLite, MongoDB, IOT, Android app Development, Arduino, Excel, IntelliJ, Eclipse, Anaconda - Jupyter Notebook
